

Cebi Group, headquartered in Steinsel, is a leading developer and manufacturer of components for automotive applications, household appliances, ventilation, electric vehicles and other industrial applications, employing 3200 people in 13 countries. Cebi Group is indeed present in 8 different countries with 11 production sites, and has produced in 2016 consolidated revenues exceeding 450 million euros. Among its customers are the most prestigious automotive and household appliance manufacturers.

Cebi Luxembourg S.A.'s headcount exceeds 600 people. We are certified ISO/TS16949 as well as ISO 14001.

To support its ongoing expansion, Cebi Luxembourg S.A., the production company located in Steinsel, is recruiting several Engineers:

## *Design Engineer (m/f)*

### **Your Mission:**

- Design, model and test prototypes for products from pre-study to development;
- Work with industrial engineers to develop and manufacture a product;
- Analyse, design and build technical solutions delivering the client's business goal;
- Define, create and maintain methodologies, procedures and standards;
- Create drawings in multi-dimensional form using computer-aided design software applications;
- Participate in the selection of material for the product and produce final design specifications.

### **Your Profile:**

- Engineering qualification or CAD designer profile preferred;
- Ideally 1-2 years of professional experience within a manufacturing environment;
- Strong attention to detail, the ability to manage your time and work efficiently;
- Proficiency using CATIA is a must along with knowledge of computer-assisted engineering;
- Knowledge of engineering, design and materials; strong people skills and the ability to work effectively, whether individually or in a cross-functional team;
- Good communicator able to successfully convey complex ideas and also deliver results under pressure whilst responding constructively to challenging new inputs and ideas;
- Enthusiastic team player in a cross disciplinary and international environment;
- Fluency in French and English. Any other language may be considered as an asset.

## *Product Engineer (m/f)*

### **Your Mission:**

- Research and develop ideas and processes for new products;
- Design, test and produce an array of Automotive Components in cooperation with our customers;
- Create performance and production criteria for newly developed concepts;
- Evaluate operational systems and recommend design modifications;

- Produce final drawings and specifications;
- Make samples of working models for demonstration.

### Your Profile:

- Electrical or Research Engineering qualifications preferred;
- Ideally 3-5 years of directly relevant professional experience within a manufacturing environment;
- Proven high level of initiative with talent for anticipating and acting on next steps.
- Experience working on projects and processes to develop systems and products;
- Demonstrated ability in influencing and leading others without formal authority, while maintaining effective working relationships.
- Strong analytical problem solving ability combined with effective analytical capabilities;
- Enthusiastic team player in a cross disciplinary and international environment;
- Proficiency with MS Office, CATIA, MS Project;
- Fluency in German and English; command of the French language desired. Any other language may be considered as an asset.

We offer a stimulating work environment and a remuneration in line with your competencies.
