

Luxinnovation is the National Agency for Innovation and Research. Its main mission is to support companies and public laboratories in their research, development and innovation (RDI) activities. In order to develop its Action Plan for the promotion of Design in Luxembourg, Luxinnovation is recruiting a:

Project Officer (m/f)

Full time

PROFILE

You have an engineering degree (design, mechanics, electronics,...) with a specific training and/or strong knowledge of Design process / product design with at least two years of professional experience. You will manage projects and introduce Design as a tool for Innovation amongst Luxembourgish businesses ranging from manufacturing firms to service providers with a particular focus on SMEs.

MISSIONS

- implementing design activities and monitoring progress as required in the Design Action Plan
- identifying, encouraging and monitoring innovation projects in companies by proactively scouting and carrying out company visits
- supporting and reviewing funding applications for innovation and design projects
- attending, hosting or coordinating design and innovation related workshops and events

SKILLS

- well organised, excellent conceptual skills and results oriented
- strong ability to work in a multitask environment, dynamic and flexible
- team player with excellent relationship skills, solid communication skills in both written and oral
- perfect command of French and English is obligatory, knowledge of German and/or Luxembourgish is an advantage
- accomplished in the usual informatic tools.

An understanding of the economic and institutional context of Luxembourg will constitute an advantage. Interested? Send your CV and covering letter by e-mail to:
